

DUNGEON ADVENTURE

- Walk through -

Description

Dungeon Adventure is a 2D RPG (Role Play Game) game where you play as a warrior tasked with defeating the King Of Death. The world has been corrupted by darkness, and you must strengthen yourself, venture into the dungeon to defeat the final boss. The game features combat, character progression, and equipment upgrades.

Game demo video:

To run the Game

1. Navigate to the directory where the game is located (using terminal).
2. Then, use the following command:

```
java -jar ./target/scala-3.3.4/DungeonAdventure-assembly-0.1.0-SNAPSHOT.jar
```

Game play

Game controls

Actions	Key
Move player	Arrow keys or WASD
Attack enemies	J
Open inventory to see your items	C
Cast fireball to kill enemy	U
Interact with object or NPC (non playable character)	Enter
Open mini map for better navigation	N
Settings / Menu	ESC

Enter key can be use for multiple purpose :

1. To **save game** (when stands next to a stoneplate and press Enter)
2. To **use item** (For example : use key to open chest, drink potion, switch main weapon)
3. To **talk to npc** (when stands next to it)

Occasionally, **if you can't go through a gate**, then you must walk around again to enter the gate.

How to Win the Game

1. Initial Preparation

- Talk to Captain Aldrin in the village to know player's goal

2. Getting Stronger

- Fight enemies to gain experience and level up
- Collect gold to buy better equipment from the merchant (The red-hooded npc)
- Find and obtain the Candle light (required for dungeon)

3. Entering the Dungeon

Make sure you have:

- Candle light (picked up on the way)
- Good equipments
- A few health potions

4. Finding and Defeating the Boss

- Navigate to dungeon level 2
- Keep your candle lit in the dungeon
- Find the King Of Death (final boss)
- Use your combat skills to defeat him

The game is won when you successfully defeat the King Of Death in the second level of the dungeon. Remember that being well-prepared before entering the dungeon is key to victory.
